

LED Line Module

Slim Stick K

This is a high-power LED line module which has highly efficient color rendering properties and an innovative lens design with high performance. Up to six modules can be connected at even intervals without color irregularity.

■ Features

- Constant voltage (DC24V) drive
- Four different color temperatures (3300K, 4200K, 5000K, 6500K)
- Size : L = 264mm

■ Main applications

- Base illumination
- Under-shelf illumination
- Architecture lighting

Slim Stick K

Lineup

Emission color	Number of LEDs	Light distribution angle	Consumed Wattage [W]	Color rendering Ra (TYP.)	Total flux {lm} (TYP.)
Cool White 6500K	10	80°	14.4W (24V-600mA)	70	800lm
White 5000K				95	600lm
Pure White 4200K				90	500lm
Warm White 3000K				90	480lm

Recommended power supply DC24V Constant-voltage power supply

External view Side stay = Threaded hole for fastening
