# LED Strip Module STC00P1N-1270

This long LED lighting module is highly efficient and reliable. Both alleviation of the LED light spots and the compact structure that prevents the light leakage to sides makes it easy to install it to the door frame of a refrigeration showcase. Thanks to unique lens design, it irradiates light evenly deep inside the showcase.

※The picture shows 1270mm and 656mm modules.

### ■ Features

- Beam angle:90 degree with glareless light distribution
- Low profile compact size(1270 X 24 X 15.5)
- Simple design
- Various length  
(Available in 350mm,656mm and 964mm)
- Can be connected with connectors from both sides

### ■ Main applications

- Refrigeration showcase illumination
- Under Shelf-illumination
- Worktable illumination

※Stainless clips are available.

### ■ Characteristics

	Emission color	Number of LEDS	Size	Weight	Input voltage	Consumed Voltage and current	Case material
STC00P1N-1270	Cool White 6250K	96	L 1270mm W 24mm H 15.5mm	240g	24V Constant voltage	10W 0.417A	LENS: PC (Clear) Body PC (White) 2 Color molded
	Temperature range	Humidity range	Light distribution angle	Illumination	Estimate life	Environmental responsiveness	IP code
	0~30°C	0~90% RH	90°	500lx@0.5m	50,000H (Ta=10°C)	RoHS	IP54 (equivalent)

※Please consult us about changes of length, color temperature and color rendering properties.  
 ※Above mentioned performance and specification may be modified without prior notice in line with new developments in technology.
